

ISLAND EXHIBITIONS

Self Declaration of Environmental Commitment for Island Exhibitions Ltd.

We are an international exhibition contractor, offering the full range of services for companies and organisations participating in exhibitions, marketing suites, conferences, road shows and product promotions. We have around 15 employees.

We have identified and comply with all environmental legislation relevant to our business activities, and currently reduce our impact on the environment by:

- Recycling a range of office based wastes, including paper, toners, computers, electrical equipment, stamps, scrap metal and batteries.
- Reducing energy use through utilisation of energy saving devices on equipment and generating on site power through the use of a woodburner.
- Reducing transport impacts through monitoring fuel consumption, regularly maintaining vehicles and using public transport, where possible.
- Purchasing fair-trade foodstuffs, and using chemicals and cleaning products that are not tested on animals.
- Supporting local charities and events.
- Encouraging staff development through training, education and voluntary work.

Although Island Exhibitions Ltd is already demonstrating a significant reduction in our environmental impacts, over the next 12 months we are also committed to:

- Widening our recycling policy to include food waste and cans.
- Developing a purchasing policy that specifies the procurement of energy efficient equipment.
- Monitoring water use and collecting rainwater for re-use.
- Improving resource management and increasing the amount of recycled goods purchased.

Date declaration agreed: 12th February 2009
